Kerchor

Best Eco Tours with Elephants in Phuket

Through the practice of this project, we also intend to help our clients to travel responsibly in their further journey.

Kerchor We build this elephant park with the mission, to bring our culture, the culture from the Karen tribe, and how we live together with elephants

Since November 2018, we started this project with the **Kerchor Elephant Park** in Mae Wang, Chiang Mai where we continuously promote sustainable elephant-friendly tourism. The elephant camp is operated by the local community of Karen tribes, who has a long traditional elephant raising where the grey giants are counted as their family members. It has been successful! A lot of positive feedback were returned to us.

From Chiang Mai to Phuket, with the same mission, we are proud to present elephant's natural habitat, and how Karen people's lives in our Elephant Family Park. We want to raise the lives of both elephants and their owners families (Karen families) to be better.
